Serial No. 09/446,202

Filed December 16, 1999

For MICROORGANISM

REDUCTION METHODS AND

COMPOSITIONS FOR FOOD

AMENDMENT

Commissioner for Patents

Washington, D.C. 20231

Dear Sir:

In response to the Office Action dated March 9, 2001 (Paper No. 7), please enter the following amendments and consider the accompanying remarks.

IN THE CLAIMS

Please amend Claim 1 to read as follows:

1. (Amended) A method for treating food to reduce the level of microorganisms on the surface of said food and make it safe to eat, said method comprising treatment occurring just prior to consumption, comprising the step of contacting the surface of said food with an aqueous dilute treatment composition comprising toxicologically-acceptable basic buffer to provide a pH of greater than about 10.5 and, optionally, toxicologically-acceptable detergent surfactant, for a period of time in excess of about one half of a minute, the composition being essentially free of any material that adversely affects safety or palatability, so that said food does not need to be rinsed before consumption.

Please amend Claim 3 to read as follows:

- 3. (Amended) The method of Claim 2 wherein said aqueous treatment composition comprises:
 - (a) less than about 0.2% by weight and sufficient to reduce the viscosity of said solution to less than about 50 cp., of toxicologically-acceptable base-stable anionic detergent surfactant;
